"Fresh from the Gardens"

## Mature Age and Efficiency

An Eastern professor recently informed a gathering of Eastern educationalists that no person over 40 years of age should be permitted to teach school. This recalls that other dictum of that famous doctor who said that every person over 65 should be quietly chloroformed. Both statements fail to convince because they are so palpably overstatements.

It is true, of course, that youth is becoming more important. Education has been the chief factor in the development of man. At the same time it appears to call for that courage, initiative and energy which are compact of youth. The war robbed one generation of its birthright and opportunities. The depression appears to this generation that which they did nothing to bring about, is natural in the circumstances, and, possibly, salutary in the result. The Communist movement in Russia was energized by the youth of Russia. Hitler has ennobled German youth under the Nazi banner. These are manifestation of youth's protest against forces inimical, they believe, to youth's fulfillment.

The trouble is to set a hard and fast line where youth ends and age begins. If that were possible, it would be possible more accurately to estimate the significance of the two statements and their many imputations and implications. But there is no such line. It is impossible to imagine a able to be born in any country. The young and men who have made their finest contributions to civilization after passing sixty-five. Had Arnold of Etton been forced to retire at 40, British education would have been that much poorer. Had Edison acknowledged his faculties exhausted at that age, much of his work for the advancement of science and enhancement of living, would have been left undone. Had forty seen the virtues of the Nazi system, he would have been compelled to do the same. He has been that competition among the great institutions of learning for his services which followed his expulsion from Germany. It was after he had passed the age of forty, that Henry Ford had his great idea and launched the enterprises co-pinned with his name. The tally of similar examples can be carried ad infinitum.

In the political field, President Roosevelt, far beyond the assigned "depression" period, has shown that he has the courage, vigor and tact which qualify him for a place with youth in those characteristics. Ramsay MacDonald, with equal energy and resource, did not hesitate, when the needs of his country called for drastic action, to scrap the ideals of a lifetime for ideas of more practical efficacy in the crisis of the hour. The youth of Russia, Germany and Italy accepted leadership of men beyond the "allotted span." Because these men oriented the chaos of ideas to a definite pattern, Youth, apparently, construed in terms of abstract qualities, cannot be measured by age,—which suggests the well-known saying: "A man is as old as he feels."

There must be some reason for a prominent educationalist to make so startling a statement to a gathering of educationalists however. It is impossible to believe that with all the improvements in education that have been made in recent years, that the same may not be found in that work of the Spanish philosopher, Ortega Gasset, who, in "The Modern Era," has suggested that each generation is distinct in itself that it differs in its reactions to ideas and environment from the generations preceding it. If this thesis be admitted, it would follow, of course, that one generation's viewpoint, being radically different from that of the one succeeding it, is out of touch with the youth of its own day, and therefore not qualified to be its mentor. The more remote the generation from that of school age, the more out of touch it would be with the student's ideas and ideals.

Whatever the difference, custom has decreed that the one should be vested with the tutelage of the other. It is difficult to see how it could be otherwise. The teacher, in this case, is the mentor. The teacher, in this case, from which the teacher he draws could not be too remote from that furnishing the school population of today, it must not be forgotten that the knowledge gleaned from experience of life and living acquired by the older generation must be of inestimable value in preparing the young for their responsibilities.

After all, a new social structure is created with each new generation. They must improve, or remodel—and the social structure characteristic of western civilization is the cumulative result of such improvements. Some thing constant is imparted from generation to generation. So long as this condition exists, the accumulated experience of the past must retain its value and finding expression through the process of education, in school or in the home, is passed on to those preparing themselves for the duties and responsibilities of life.

Youth demands recognition and should be recognized. But an intelligent definition of youth, other than that of mere time, is necessary to complete acceptance of the statement that no person over forty should be entrusted with the task of teaching youth.

Science gradually is extending the period described by life insurance companies as "life expectancy." Why, then, if chloroform is the best poison, when one has reached sixty-five?

### Rule For Egg Shipments

No Canadian eggs are allowed to be exported out of Canada unless they are packed in Canadian Standard cases—each case containing 30 dozen eggs. Each case contains 100 shillings and flats, with new kiln dried paper-covered, excelsior pads at top and bottom, or with any other pad, flat, or cushioning approved by the Dominion Minister of Agriculture.

A wheel in the great clock of the former royal palace at Petoskan, Germany, revolves only once in a period of 400 years. There's a clock to hold a clock-watcher.

## Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop your breath, or if you feel weak and tired and stop and think as to the cause of your trouble, you should do take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

### Held Strange Congress

Romanians Of World Fair Establishment Of Stable Community  
"Gipsies and world units!" is the motto of the General Assembly of Romanians which held a strange con-gress in Bucharest.

The wave of fanatic nationalism which is sweeping these parts of Europe has affected the gypsies who want to give up their free and easy life and organize themselves into a race-conscious and stable community. Thus the last citadel of romanticism and liberalism in its absolute form seems to be ruined and will be replaced, in all probability by political demagogery.

Hundreds of Romanians in picturesque dresses came to the congress, flocking in from all over the country. The opening session took place in the open air, in the gipsy quarter of Bucharest which consists of immovable mud huts built around a pestilential lake on the outskirts of the city. A regiment of gendarmes took care that the participants behaved themselves.

The congress was held in perfect order. The gipsies seemed convinced that they were entering upon a new era of progress and dignity. As was anticipated by last year's General Lausanne, an exceptionally good personality of Hitler both as regards aspect and oratory. Following are some of his most galvanizing phrases:

"We are a great and strong people. We don't want to be ruined. We treat them as the dregs of society. Let us form a strong nucleus in Roumania and all the Romanians of the world will be inspired by us and become proud of their race."

### Unusual Staff Employed

Work In London Restaurant Done By

Ex-Convicts

London has a restaurant which is partly staffed by ex-convicts and men and boys who are on probation, the promoter being Arnold Hall, connected with the Howard League for Penal Reform and very much interested in the work of assisting "old lags" to re-enter society. The ex-convicts and ex-prisoners are said to be satisfactory.

Arnold Hall began in 1928 in a cellar, with a convict who had been 33 years in prison, a large piece of cloth and himself. They did upholstery work until they had enough money and the present restaurant and canteen are said to be satisfactory.

Arnold Hall began in 1928 in a cellar, with a convict who had been 33 years in prison, a large piece of cloth and himself. They did upholstery work until they had enough money and the present restaurant and canteen are said to be satisfactory.

The things work very harmoniously and the men are extremely happy," Mr. Hall said. He explained that the restaurant is open from 80 to 90 lunches are served every day, not only giving the men their industrial opportunity, but it is providing an acid test to, their intentions to go straight.

The men start with a wage of 75 cents a week and their lunch, for a fortnight. After that they were given 25 shillings a week and later, if they are doing well, they receive 35 shillings a week. Eventually they are made waiters and receive 50 shillings a week. The men are given 25 shillings in tips.

There are men working in the restaurant who have been in prison for more than 30 years. Boys are sent to him instead of to Borsal, the magistrate paying their wages.

### Curasow In St. Louis Zoo

Iten Foster Mother Cannot Under-  
stand Strange Bird

Among strange friends is to be found the affable at 100,000, in size, a baby curasow, a parrot-like bird and an ordinary domestic hen.

The reason is strange, too, but understandable. Knowing that a curasow, a black bird glossed with purple, does not lay an egg for its eggs, two ornate feathers under a delicate hen. Much to the surprise, one of the eggs hatched.

The antics of the youngster have almost driven the hen frantic, but it's a common sight at the zoo to see the young bird, on the average, 100 days after the size of a man's thumb, about the back of its foster-mother.

Surefooted Was Right

The government has been particularly interested in the skillful driving of an old farm-hand.

"That's a sure-footed horse you have there," he remarked, as the horse and cart went by.

"Aye, mister, it be," was the reply. "It's kicked me three times, and always in the same place."

Fifty years after Jessie Boot started his first store in Nottingham, England, his widow, Lady Trent, has just opened the 1,000th branch.

The "Buy Netherlands" campaign is reported to be helping Dutch indus-

tries.

## WORKED ONLY ONE WEEK IN TWO

### Scatica Kept Him At Home

It is the wife who sends this information about her husband's troubles. She writes—"For some time past my husband has been unable to work or even sleep in bed on account of sciatica. He suffered so much from it that he could not get out of bed without help. What we saw in the papers an article concerning 'Handi-Roll' was taken in 'Hillside' dose of Kruschen every morning. Now, he has no more trouble with the sciatica whatever regularly." (AMM)

Doctors estimate that one-half of the world's humanity suffers from sciatica, and that the participants had themselves.

The congress was held in perfect order. The gipsies seemed convinced that they were entering upon a new era of progress and dignity. As was anticipated by last year's General Lausanne, an exceptionally good personality of Hitler both as regards aspect and oratory. Following are some of his most galvanizing phrases:

"We are a great and strong people. We don't want to be ruined. We treat them as the dregs of society. Let us form a strong nucleus in Roumania and all the Romanians of the world will be inspired by us and become proud of their race."

#### SYNOPISES

Camilla Hoyt and Peter Arson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter, however, is a gambling scoundrel trying to win a competition for a scholarship abroad and Camilla is the added attraction that tempts him from his family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding a good agency. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter; Mrs. Hoyt, Peter's mother; and Gus Matson, his former room-mate with whom he has quarreled. At first, Peter is a bit shocked by Camilla's guests with impersonations. When the rest of the members of the party go to the beach, Peter and Camilla slip off to the beach themselves and fall asleep on the sand. When they wake up, they find a morning and Avis and another boy are standing near them.

(No Go On With The Story)

CHAPTER XXVI

Avis' surprise and consternation over her discovery of Peter and Camilla on the beach in the early morning, were no less than Camilla's. The first light of dawn cast grotesque shadows on the four faces that stared at each other through the sand. They had been lying there, wondering exactly what words had been exchanged.

The pallor of fatigue and faded make-up gave to Avis the haggard appearance of a much older woman; while Camilla, like a jilted bride, was vividly gloomy like the promise of sunrise in the sky. She met Avis' accusing, triumphant, angry gaze with a half smile, as if the situation amused her.

All four of them appeared ridiculous now, for there is no light more merciless to face than that of the early dawn and there is nothing that so leaves its stamp upon the features as the night abased as day.

Avis' eyes were wide and she creased. "So, this is where our hostess spent the night?" her words blazed with scathing emphasis.

Camilla dismissed all effort at self-defense. "It beats spelling the night where you went. You know what got back." Peter and I were waiting for you, but we didn't think you would stay in town all night. We must have dropped off sleep." She had scrambled to her feet and was shaking the sand from her dress.

"I should think you did. Waiting for us?" Avis sneered, and turned to Terry with a scornful imitation of laughter.

Terry shifted his weight from one foot to another, avoided Camilla's eyes and said, "I'm sorry."

Peter's jaw was set, but the expression which lighted his eyes denied his serious concern. Fate had forced the issue, he was thinking.

**No Cold is a Fixture with Buckley's Mixtures**

Mr. Mc. No longer has heat and dangerous chills or colds, but he says, **BUCKLEY'S MIXTURE** conquers it! It is next to none in the relief it gives. It is the best cold remedy you can feel doing its good.

In fact, it cures all sorts of ills, when they take it for the first time.

If you, or your family, are sickly, fatigued or breathless, try Buckley's Mixtures. They're delicious. Buck-ley is sold everywhere.

Perhaps it was best, after all. He looked at Camilla and smiled a little. They certainly didn't do nice things guilty culprits. Avis was thinking with surprise. "I wouldn't say that thing now," she added quickly.

"Then, we had better all go up to the house," she suggested, seeming not at all perturbed.

Avis looked at her querulously. She was willing to let the others follow. You prefer social conventions, but Camilla's nonchalance in the face of such evidence as this, astonished her. The four turned and ploughed through the sand in silence, single-file in a desolate little procession.

The girls mounted the steps that climbed up the side of the cliff house. Avis leading. The boys stopped below, to light cigarettes.

"Well?" Terry implored under his breath, but Avis ignored him. "Sorry, we went to look for you, but we inhaled. What are you going to do about it?"

Peter inhaled and exhaled the smoke slowly. "Whatever Camilla decides," he said, and started up the steps again. "I can't wait it up!" suggested Terry. Quietly, in spite of the single standard of morals, men defend each other in such difficult crises, and women are eager to betray one another. Women protect themselves from men, but still cling to the ancient characteristics of primal jealousy and feminine revenge that were fostered by her dependence upon man.

Peter muttered his appreciation. "Decided you to suggest?" Then Camilla's eyes lit up again right.

Some of the guests had retired to their rooms, but enough of them were about to witness the triumphal entry of Avis and Peter. She said nothing, but her elaborate air of mystery and her determined bearing made it clear exactly what words had been exchanged.

"So you found them?" Camilla had exclaimed when they first appeared. "We're really anxious about you, Camilla. No one knew where you were. And I am anxious about you." Avis continued to stand by the window. In this situation, she looked at Camilla querulously and added, "Well, now that we're all here, let's turn in. I'm dead!"

Avis turned to the door. "I've had enough of this."

"Before you go," Camilla's soft voice sounded strangely resonant in the thin stillness of the early morning, and every eye turned to look at her closely. She had a secret in her mind, a secret she wanted to tell her husband. Peter and I have been married for more than a month and we expected to keep it a secret for awhile longer—" she stopped, with a little helpless gesture which explained everything. The silence grew more tense.

"Married!" Camilla was the first to exclaim finally. "Why, you silly old people! You'll never let me have the girl!" She threw her arms around Camilla and kissed her. "Peter, I am the bride! Say, let's raise the curtain out and celebrate the good news."

"Please don't," Camilla begged, "Let's get some rest and celebrate later. Remember, even mother and father know nothing about it, yet. Wait for me to explain everything to her first."

"Married!" Camilla was the first to exclaim, finally. "Why, you silly old people! You'll never let me have the girl!" She threw her arms around Camilla and kissed her. "Peter, I am the bride! Say, let's raise the curtain out and celebrate the good news."

"Please don't," Camilla begged, as if each of them enjoyed the idea of entering the conspiracy to keep the affair secret for a few more hours. Only Avis did not relinquish her air of shocked disapproval, and stood upon leaning for home with Terry.

"As you wish," Camilla said, with no effort to deflate her.

So it happened that it was Avis' foot to touch the announcement of Camilla's marriage to Peter. At a discreet hour of the morning, Mrs. Werth telephoned her social antagonist with a sneaking fear of malevolent delight.

"I did never suppose," she told Mrs. Hoyt with distinct emphasis, "that when I permitted my daughter to attend your house party, I was exposing her to questionable influences."

"Oh, you know about my daughter finding Camilla with that young nobody who has been seen with her. Of course, Camilla says she is innocent."

"It was the charge which disturbed Mrs. Hoyt from her lethargy of wonder and led to action. She terminated the conversation with Mrs. Werth as ardently as the subject permitted, and hastened to Camilla's room.

Camilla had not slept since retiring, but she was resting until the

## How To KEEP FIT

When your physical condition is disturbed and you feel tired and "headache" that you can't seem to get rid of, it may be that you have been overdoing it for several successive days until the normal balance of your body is upset. Nature has the aid she needs in this for you. Then, when normal habits are restored, you will feel well again.

Eat moderately. Get lots of sleep, fresh air and exercise. If you are not well, see Dr. Peter's Favorite Prescription.

Get Andrew's Liver Salve or twice a day. Get Andrew's from your druggist. If you are not well, see Dr. Peter's Favorite Prescription.

Take 2 Aspirin Tablets. Drink full glass of water. Repeat treatment in 2 hours.

## The Story Of A Horse

Veterans Of War Now Pensioned By Their Owners

Twenty-two years old and a war-veteran, two wounded and possessing a record of three to four years' active service, is Major Andy, a round-barrelled, dark bay mare, now lives in honored retirement. The pensioner is her owner, Colonel John McLaughlin, C.M.G., D.S.O., V.D., on a farm just outside Bowmanville, Ontario.

Foaled in 1911, Major was just four years old when she enlisted in the First Canadian Contingent—in the ranks of the Royal Canadian Dragoons. She was a star, and the stars shone on her, for she became the charger of the Commanding Officer, the late Sir David Watson, K.C.B. Major also continued to perform that duty with credit until 1916, when she was sold to the Canadian Cavalry Corps for a bribe in \$100 and was implanted by a mining outfit from the western plains, named Minnie, who was the favorite of Lieutenant Col. W. M. Hayes.

Major's years were almost completely wiped out when the late Brigadier General R. P. Clark, C.M.G., D.S.O., M.C., brought a chestnut horse to the battalions as his first mount, on his becoming commanding officer. But with his departure, Major again came into play, and during the last two years reigned supreme among the equine members of the unit, as Colonel McLaughlin's first horse.

Unusually intelligent, gentle, courageous and fleet, Major was always popular with the men in the front lines. She was twice wounded, but always carried on. And now, in the twilight of her existence, few remain to give her the gurgle which she had for so long termained when any great loved and bound which horse stepped with better gait or held high his head with greater pride.

From The Legionary.

## French Plane Spans Ocean

Completes Crossing From Africa To South American Port

The great French flying boat, "Southern Cross," reached Natal January 4, completing an Atlantic crossing from Saint Louis, Senegal.

The plane landed at 7:10 o'clock for a stopover en route to the 1,790 miles to the port of Saint Louis, Senegal, from Saint Louis to Natal is 1,970 miles.

The four-motor hydroplane is the French entry in a race with Germany to become the first trans-Atlantic air mail service between Europe and South America via Africa.

It is capable of carrying 11 tons of fuel.

Within two months the French plane is expected to inaugurate daily service between Paris and Rio de Janeiro, a nonstop 18-hour flight, a distance of 4,700 miles, from Paris to Rio de Janeiro.

The giant plane with a wing spread of 144 feet, landed easily on the Potengi River. The flyers said they averaged 110 miles an hour.
